DETAILED ACTION

1. Applicants election and amendment filed on Jan. 19, 2005 have been entered. Claims 1-9, 22-100 have been canceled. Claims 10-21, 101-105 are pending.
2. Claims 104-105 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. The newly added claims 104-105 being drawn to "stereoisomer" or "racemate" of the specific compounds of claims 101-103 lack antecedent basis and enablement.

Please note that the species as claimed in claims 101-103 were not disclosed to be separated stereoisomers or racemates. The only description of the application as originally filed is the "*" marked on a chiral center in a generic formula. Such description is insufficient to provide descriptive and enabling support for any stereo isomer or racemate of any species within the genus in absence of specific identification and enablement for a particular species because it is well recognized in the thalidomide art that whether a derivative of thalidomide exists as inseparable racemate or can be separated into stereo isomers depending completely on the specific substituents on the ring system (see CA 110:882). In absence of any description or enablements in "any" compounds of claim 10 (see p150-168, examples I72-I114) which and how among the indiscriminative molecular formula can be picked and chosen to be inseparable racemates or separated into stereo isomers, the instant claims being drawn to the specific isomer or racemate of the species, lacks sufficient antecedent basis, description or enablement from the specification and thus are new matter.

Art Unit: 1625

Removal of all new matter is required. In re Rasmussen 210 USPQ 325.

3. Claims 101-103 are objected to because the propriety of whether the named compounds reading on the base claims are confusing based on the limitation as observed in claims 104-105.

It is recommended that structural delineation be made of record to check on the propriety of dependency.

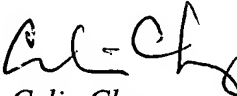

4. Claims 10-21 are allowable.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Celia Chang whose telephone number is 571-272-0679. The examiner can normally be reached on Monday through Thursday from 8:30 am to 5:00 pm.
